Subject: (\_\_\_\_\_)

Dear Wallace Ross,

I, Seth Robins, have been working as a software developer in Ask IT solutions. I have completed a bachelor degree course in computer science from the Trinidad University of Ohio. Also, I have two years of experience as a software developer and tester.

The subjects in my graduation provided me key insights in software development, testing and website maintenance. Moreover, I have also completed the Sun certifications in Java course shortly after my graduation. All these aspects have provided me with a strong base for studying the master's course in computer science. Therefore, I am applying for a Masters Degree in Computer Science, which is offered by your reputed college. Your highly educated and experienced staff, exceptional training facilities and fully fledged practical rooms of your colleagues have also influenced my decision to a great extent.

I assure you that I will adhere to all the rules set by your college at all times. Moreover, I am an ardent follower and believer in technology which supplements my learning skills in a significant way. Therefore, I request you to consider my application.

Thank you for going through my application.

Yours sincerely,  
(Your Signature)  
Chester Bennett
