Subject- Cover Letter- Application for joining Internship in Electrical Engineering.

Dear Sir,

Referring the advertisement recently uploaded at your website and some social media sites regarding the upcoming Internship programmes to be held at your organisation, I, as a student of third year in Electrical Engineering at XYZ College of Engineering Pittsburgh, want to join the workshop to enhance my learning on practical grounds. Although I have gone through various practicals during my last semester in college studies but I am really enthusiastic to join and experience the real work environment.

I have also gone through the whole index of areas to be covered during the internship and that made me more excited as some are very close to my interests too. Kindly consider my application for this programme and grant me your kind approval.

I am heartily thankful for your consideration and understanding. It will be really pleasant to hear from you soon.

Thanking You.

Yours Sincerely,
Peter
Pittsburgh
