Subject- Cover Letter- Application for Internship in Mechanical Engineering.

Dear Sir,

With the reference of recent advertisements at your website and social media sites for the application to join Internship in Mechanical Engineering specifically in “Gas Pipeline and Services”. I, as a student wants to apply for joining this programme and learn best in upgrade my knowledge and skill-set and at the same time get some hands-on experience. I have also seen the desired eligibility criteria mentioned on your website for the application where I found myself as eligible.

I am currently doing engineering and having practical lab work experience in City Gas Pipeline Network Designing. And I would like to continue and learn much more in the same field so that I could enhance my practical experience and pursue best ahead.

Kindly accept my application for the next process and grant your approval.

Thanking you for your consideration and understanding.

Yours Sincerely,

Wil Hern
Manhattan
