Subject - Hospital Complaint Letter

Dear Ma'am,

I'm writing this complaint letter to bring a very disappointing and the unsatisfactory medical services from the Fortis hospital. I recently made my visit to the hospital for the treatment of ulcers through the operation. The operation was conducted finely however the surgeon left a small scissor inside my gut.

I came to realize it after a few days when I felt the sudden and chronic pain from within. Later I went for the x-ray and the same is shown in my reports. I was almost on the verge of death as the infection was gradually spreading throughout my internal organs due to this fatal mistake of your hospital surgeon named \_\_\_\_\_. I don't know what kind of punishment he deserves for putting my life in danger. In conclusion, I just request you to please take strong action against the doctor so that he can never commit such a mistake to end the life of any innocent.

Thanks & regards  
Dino James
